Bibliography

Consolidated from all research conducted for this project. Three categories, each sourced from a specific project artefact — no reference below was fabricated or supplied from memory; every entry is traceable to the file noted.

1. Academic literature (the 7 supplied papers)

Full BibTeX, reading provenance, and per-paper structured summaries: outputs/literature/literature_review_synthes
(§1 for summaries, bibliography block near the end of the file for BibTeX).

Chase-list (cited by the reviewed papers, not yet read for this project — flagged in `literature_review_synthesis.md` §4 as worth pursuing if the project continues): Cintia & Pappalardo, *Coach2vec* (arXiv:2106.15444) — models coach-level style directly and must be read before any novelty claim about manager-level modelling is finalised; Plakias, Kokkotis et al. (2023) — the original source of the 19 latent variables reused by Plakias et al. (2025); Rein & Memmert (2016) — cited as the strongest argument for why a knowledge layer is needed at all.

2. Manager tenure and tactical-philosophy sources

77 individually-attributed sources (club official statements, Wikipedia managerial records, Opta/StatsPerform analyst pieces, Coaches' Voice, Spielverlagerung, Total Football Analysis, and named press outlets), each corroborated against ≥2 independent sources per tenure claim. Full numbered list: `data/external/manager_tenures.md` §4 (77 sources) and `outputs/football_knowledge/manager_philosophy_hypothes` (Sources sections, per manager).

Representative highlights (full list in the two files above): - Perarnau, M. — *Pep Confidential*, cited via Perarnau Magazine (martiperarnau.com) for Guardiola's *juego de posición* framework. - Coaches' Voice — "Pep Guardiola: Coach Watch" (2021); "The tactical evolution of Pep Guardiola's Manchester City" (2026); "Roberto De Zerbi tactics and style of play" (Brighton/Shakhtar/Sassuolo). - Spielverlagerung — "Manchester City: Positional play analysis" (2017); "Previewing Pep Guardiola's Manchester City reign" (2016). - Opta Analyst (theanalyst.com) — multiple data-confirmed statistical pieces on Guardiola's Manchester City tenure (2019-2025). - SoccerTutor.com, Medium (SHfootball) — De Zerbi's goalkeeper/centre-back build-up mechanism. - Wikipedia — managerial-statistics tables for Guardiola, Klopp, De Zerbi (tenure dates, cross-corroborated against club/press sources per `manager_tenures.md` §3's documented conflict-resolution log).

3. Data source documentation

- StatsBomb Open Data — `https://github.com/statsbomb/open-data` (competition/match manifests, event data, match-level manager attribution).
- `worldfootballR_data` (JaseZiv) — `https://github.com/JaseZiv/worldfootballR_data` (FBref/Opta match-level advanced statistics mirror; `fb_advanced_match_stats` release used as the primary source, per `decision_log.md` D-002).
- `soccerdata` Python package — tested for FBref/Understat access; FBref direct access blocked (HTTP 403) from this environment, Understat's schema insufficient alone (`outputs/audit/data_availability_matrix.md`

§6).

- Kaggle “European Soccer Database” (Hugo Mathien) — investigated as a possible historical extension for Bayern/Dortmund; schema found insufficient (FIFA-video-game ratings and box-score events, not passing/pressing detail) — see `decision_log.md` D-005 for the full assessment.
